

## YOUR OPINION IS IMPORTANT

The **Covenant of Mayors and Mayoresses for Climate and Energy** is the world's largest movement of local governments that voluntarily commit to implementing and exceeding the European Union's climate and energy objectives.

Curbing climate change is a common challenge for all citizens.

Thereby, **Sustainable Energy and Climate Action Plan of Calvià (SECAP) 2020-2030** is established as a fundamental tool for the mitigation and adaptation of our municipality in the face of a climate emergency.

With your help we can make this new strategy have:

- ✓ **More transparency**
- ✓ **Better adaptability to the real needs of Calvià**
- ✓ **Greater commitment and social integration**

That is why I invite you to participate and send us your contributions.

**Rafel Sedano,**

Deputy Mayor for Environment and Ecologic Transition of Calvià Town Hall.

## DO YOU WANT TO PARTICIPATE?

If so, please do not hesitate to communicate us your interest indicating if you do it personally or on behalf of any entity.

**Calvià Town Hall's social media**

## WHO IS CONCERNED?

- Public entities, universities and other educational centres
- Companies from all the hotel, tourist, commercial, transport, agricultural and livestock sectors
- Chambers of commerce or professional colleges
- Population in general and population under energy poverty in particular
- NGOs and other associations
- Neighbourhood, student, company or worker groups
- Regional and local energy agents

“

The climate emergency is a race that we are losing, but it is a race that we can win. The climate crisis is caused by us and the solutions must come from us. We have the tools: technology is on our side.

---

António Manuel de Oliveira Guterres  
**General Secretary of the UNO**
